

# PALMIT 98

## Energy Supplement for Dairy Cows

**99%  
Pure Fat**

**Non GMO**

**Trans Fat  
Free**

PALMIT 98 is a pure vegetable fatty acid with a very high palmitic acid concentration, derived through several processing steps from non-genetically modified palm oil. It is produced in a modern plant (ISO and GMP certified) in South East Asia and in close proximity to the natural raw material, thereby securing a homogeneous and completely traceable product of high quality. A clearly defined co-operation agreement with the producer ensures a reliable and safe production, giving the customer a cost-effective source of energy with important nutritional, physiological and health benefits.

PALMIT 98 consists of predominantly long-chain saturated fatty acids which makes it resistant to fast oxidation and spoilage. The high melting point of approximately 62° C gives it high rumen by-pass qualities and it is nearly completely absorbed in the small intestine.

PALMIT 98 has very high energy content, and combined with its high digestibility as well as the outstanding technological qualities of a spray-dried fat powder, it is also used as an energy-rich supplement in pig & poultry diets.
